

Grace Wileman
Graduate Futures
Consultant, Icen
Futures

DD: 020 3435 4227

E: gwileman@iceniprojects.com

With her **knowledge** and experience of **Geography** and **Sustainable Resources**, Grace is well-placed to forge flexible solutions to the challenges of our **ever-changing world.**

From formulating Sustainability and Energy Strategies, to designing Sustainable Drainage Systems, Grace is well-versed in advising on and analysing forward-thinking projects.

She has worked on a wide range of projects, both individually and in collaboration with other consultant teams, ranging in size from single dwellings to major developments, and neighbourhood extensions.

Alongside these, Grace has focussed on analysing the daylight and sunlight impacts of proposals, assessing the risk of flooding to future developments, advising on measures to mitigate and adapt to the changing climate, and developing waste and recycling strategies. Moving forward, she will also concentrate on delivering Biodiversity Net Gain, devising Circular Economy Strategies, and carrying out Whole Life Carbon Assessments.

At the heart of Grace's work is her drive to aid clients in achieving their sustainability-related goals and, in doing so, contribute to the much-needed move towards a more sustainable and resilient urban environment.

When not in the office, Grace is usually either lifting weights in the gym, or out walking her two dogs. On occasion, you might well find her wading through mud or swinging across the monkey bars on a Spartan race course.
